

## **Experience Designer (Intern/Part Time)**

DemoDisplays is looking for a candidate to assist us with research and ideation for physical experience creation, at our mHub location. Communication + Strategy + Visualization is a must.

### **For whom is this post for?**

This is a part-time hourly or contract paid position for a new grad or highly talented design student. Design background candidate with a human-centered design experience and technology comprehension is preferred. The workload is subjected to vary by week and the work schedule is flexible.

### **Is this you?**

Candidate should be an organized design strategist with a developed skill set in design. Your responsibility will be assisting us with research, ideation, idea sketching/presentation, and final execution.

*Are you able to grasp concepts quickly and sketch them out? Are you creative, but organized? Do you care about crafting an impactful story using illustration and other visuals? Are you an idea person who would like to challenge themselves in a highly creative field? If the answer is “yes” to all of them then this might be a good fit for you.*

### **What do we do?**

Demo Displays is part of DeviceDev Consulting, Inc. which is a small product development consultancy located out of mHUB Chicago which creates physical experiences for technology demonstration and communication purposes. The demos that we create serve as tools for marketing, sales, and training purposes. We work in oil, gas, chemical, medical devices, IoT consumer electronics industries.

### **Your task consists of:**

Research, ideation, illustration, and final execution from concept to completion while working collaboratively with staff and clients.

### **You must be:**

- Able to make a clear judgment and simplify technically complex problems.
- Starter who is able to take action if the tasks are unclear. (Willing to experiment.)
- Positive attitude person who is willing to help.

### **Candidates should rate their skill and experience level for:**

- Sketching
- 3D CAD
- Photoshop
- Presentation making using Google Slide

***\*Please note that responsibilities for this role will grow based on your ability.***
